Ghaida Ahmed Almughamis

Senior Software Engineering Student

Riyadh, Saudi Arabia | +966 50 681 8878 | ghaidahmed.tech@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Senior Software Engineering student at Princess Nourah bint Abdulrahman University with experience delivering individual, academic, and hackathon projects. Interested in software development, AI integration, and data analysis, with demonstrated experience transforming ideas and requirements into functional, user-focused solutions.

EDUCATION

Bachelor of Science in Software Engineering Expected Graduation: **2027**

Princess Nourah bint Abdulrahman University, Riyadh **GPA: 4.83/5.00**

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, PHP, SQL

Web Development: React, Next.js, FastAPI, HTML, CSS, Tailwind CSS

Databases & Data: PostgreSQL, Supabase, pgvector, pandas, Data Analysis, Data Visualization, Microsoft Excel

Software Engineering: SDLC, Requirements Engineering, Software Architecture, Software Design, Agile, Scrum, Waterfall, Software Testing, Software Quality Assurance

DevOps & Deployment: Git, GitHub, Docker, CI/CD, Vercel, Render

Design, Modeling & Development Tools: Figma, Canva, Lucidchart, Draw.io, VS Code, Xcode, Anaconda

SELECTED PROJECTS

ANCHOR | Full-Stack Developer | Individual Personal Project

- Adaptive learning platform that converts course materials into personalized tutoring and study resources.
- Built the full stack, database, authentication, AI integration, and deployment.

Technologies: React, TypeScript, FastAPI, PostgreSQL, SQLAlchemy, pgvector, Supabase, Docker

LittleLens | Full-Stack Developer | Individual Personal Project

- Bilingual platform that evaluates YouTube content for child safety, age suitability, and educational value.
- Built the full-stack workflow, scoring system, Arabic/English interface, integrations, and deployment.

Technologies: Next.js, TypeScript, Tailwind CSS, AI Integration, Vercel

ATHAR | Full-Stack Developer & Data Analyst | GASTAT Hackathon Team Project

- Digital observatory that measures and visualizes gig-economy activity across five Saudi cities.
- Collected and analyzed the data, designed the Gig Activity Index formula, and developed the interactive dashboard.

Technologies: Python, Streamlit, pandas, NumPy, Plotly

Cyber Kids Academy | Developer & Scrum Master | Team Academic Project

- Gamified platform that teaches cybersecurity concepts to children through lessons, games, and quizzes.
- Contributed to the design, architecture, and development; served as Scrum Master and managed the user stories and product backlog.

Technologies: HTML, CSS, JavaScript, Supabase, PostgreSQL

CERTIFICATIONS

- Oracle Database Foundations Certified Junior Associate — Oracle
- CCNA — Cisco
- Software Product Management — University of Alberta, Coursera
- Make Agentic AI Work for You — IBM SkillsBuild, June 2026

LEADERSHIP, VOLUNTEERING & ACHIEVEMENTS

First Place — Ofuq Exhibit | Cyber Kids Academy | November 2025

Volunteer, Strategic Expansion Committee | Ajyalna Al-Wa'eda Initiative | August 2026 – Present

- Support the initiative's expansion planning and outreach efforts.
